

Geography

Geography

- 1 Interpret, use and construct maps, globes, and other geographic tools to locate and derive information about personal directions, people, places, and environments (The World in Spatial Terms). SS.G.1**

- 2 Describe the physical and human characteristics of place and explain how the lives of people are rooted in places and regions (Places and Regions). SS.G.2**

- 3 Describe and explain the physical processes that shape the earth's surface and create, sustain, and modify the cultural and natural environment (Physical Systems). SS.G.3**

- 4 Identify, explain, and analyze how the earth is shaped by the movement of people and their activities (Human Systems). SS.G.4**

- 5 Analyze the interaction of society with the environment (Environment and Society). SS.G.5**

- 6 Explain geographic perspective and the tools and techniques available for geographic study (Uses of Geography). SS.G.6**

- 7 Analyze the world and account for consequences of human/environment interactions depicting the geographic implications of world events. SS.G.7**

- 8 Explain components of the Earth's physical systems and their interrelationships (e.g., landforms, bodies of water, atmosphere, and geologic factors). SS.G.8**

- 9 Identify factors that contribute to human and physical changes in places and regions. SS.G.9**

- 10 Identify and define the world's physical and cultural regions, including political and historical characteristics, and their interdependence in regard to trade, services, migration, and cultural values. SS.G.10**

- 11 Analyze populations with regard to life expectancy, infant mortality rates, population pyramids, migration, and birth and death rates. SS.G.11**

- 12 Evaluate the impact of migration on physical and human systems. SS.G.12**

- 13 Analyze growth, decline, and development of cities over time. SS.G.13**

-
- 14 Compare and contrast the impact of competition for limited resources on an interdependent global economy (e.g., distribution, sustainability, conflict, and resolution).** [SS.G.14](#)
-
- 15 Examine global social and political factors and their implications.** [SS.G.15](#)
-
- 16 Analyze ethnicity, nationalism, and religion of regional cultures in a global society (e.g., major world religions, various ethnic groups, and rigidity of societal norms).** [SS.G.16](#)
-
- 17 Analyze the influence of geographical features on the evolution of significant historic events and movements.** [SS.G.17](#)
-
- 18 Analyze the impact of technology or its lack on environments and societies over time.** [SS.G.18](#)
-
- 19 Analyze connections between physical geography and isolation from the world community which result in cultural and political instability.** [SS.G.19](#)
-
- 20 Identify causes and draw conclusions about landless cultures.** [SS.G.20](#)
-
- 21 Compare and contrast standards of living in poverty-stricken areas with advanced societies (e.g., basic needs, education, economic opportunities, and technological advances).** [SS.G.21](#)
-
- 22 Utilize various geographic information systems to gain insight into people and their place in the world.** [SS.G.22](#)
-

Application

- 23 Career options.** [SS.G.23](#)
- 1 Identify careers in geography. [SS.G.23.1](#)
 - 2 Identify resources to help select geography programs for further study. [SS.G.23.2](#)
-
- 24 Educational requirements.** [SS.G.24](#)
- 1 Identify degree requirements for geographers and geography-related careers. [SS.G.24.1](#)
 - 2 Identify resources to help select geography programs for further study. [SS.G.24.2](#)
-
- 25 Vocational applications of geography.** [SS.G.25](#)
- 1 Discuss ways in which geography addresses domestic and global issues. [SS.G.25.1](#)
 - 2 Identify careers in geography that have evolved as a result of domestic and global issues. [SS.G.25.2](#)
